

# DIRT PAN

## MODEL DP 60 AND MODEL DP 84

◆ The Dirt Pan attached to the three point lift of a tractor is intended to be used in landscaping, agriculture, and light construction. The unit provides an efficient means of scooping, lifting and moving soil between points without dragging the soil.

◆ Features include variable cutting depth, controlled by the tractor's three point lift, and variable dig angle and dump height hydraulically controlled also by the tractor's single remote valve.
